WHEN RESULTS MATTER

AN INNOVATIVE PARTNER

STRATEC is an established reliable, predictable and innovative partner for market leaders and dynamic market changers – companies committed to delivering high quality solutions to improve health that make a difference for their customers.

STRATEC offers more than engineering skills around the automation of hardware and software solutions – we understand your vision and offer solutions from the first idea, through the development and approval process, to manufacturing your final product.

REQUIREMENTS AND SPECIFICATIONS

Working together we translate your ideas and requirements into specifications and a concept with a clear timeline and a defined budget right from the start.

INSTRUMENTATION

We develop innovative customized hardware and software solutions using a modular approach to create highly reliable automated workflows that fulfill regulatory requirements in all markets. Our main focus lies on complex analyzers for high value diagnostic market segments. We have a history of delivering class leading products using molecular testing methods, random access heterogeneous immunoassays, single-molecule and micro-array based technologies.

Our Diatron brand offers bench top instruments in the fields of Clinical Chemistry and Hematology for both human and veterinary use.

Simoa™ HD-I Analyzer
Quanterix

Abacus 5
DIATRON

Pictus 500
DIATRON

MosaiQ®
Quotient Biodiagnostics

Evolution™ Cartridge
MyCartis

CONSUMABLES

We provide a comprehensive array of services to help you realize your consumable requirements. We can industrialize your ideas and offer development, mass manufacturing and supply of polymer-based smart consumables. These can be used in diagnostics, life science and a variety of medical technology applications.

Our broad sample management expertise enables us to provide customizable solutions for nucleic acid sample collection, stabilization and purification

Additionally our Diatron brand provides customers with system liquids and reagents for use with instruments in the fields of Clinical Chemistry and Hematology.

LABORATORY SOFTWARE

We provide customized data management and middleware solutions and approved off the shelf products to fit your product offering and integrate your solutions into the laboratory workflow of your customers.

REGULATORY COMPLIANCE AND QUALITY MANAGEMENT

We use a certified Quality Management System to control the regulatory compliant processes used throughout our development and manufacturing, alongside established complaint handling, change control and proven risk management.

Our state-of-the-art systems deliver comprehensive documentation to facilitate smooth approval processes in relevant markets.
