

PARTNERING  
ALONG NEW LINES

# ENABLING YOUR SUCCESS

The STRATEC Group provides innovative and market-leading automation solutions for diagnostics and research. We understand your needs and translate your vision into solutions. From the initial idea through development and approval processes to the long-term manufacture of the product.

Our partnerships are built on mutual trust, continuity and professionalism. We share a common mission with our partners to develop safe and innovative products that consistently fulfill expectations.

Together we make it happen!

## AN INNOVATIVE PARTNER

FlexiMass™-DS MALDI target  
Shimadzu Biotech

STRATEC Consumables provides a comprehensive range of services to help you to create a customized consumable in the most appropriate polymer. Over many years of research and development, we have developed a unique combination of skills including nano- and microstructuring, coating technologies, polymer sciences and automated assembly. We take your ideas from concept to mass production!

Hologic

STRATEC consults, designs, develops and produces fully automated solutions for its partners in the field of diagnostics including blood banking and research. We design instruments to our partners' requirements to maximize performance of your reagents and introduce proven technology to reach outstanding reliability targets. You benefit from a proven track record of delivering market-leading diagnostic systems for random access molecular testing, heterogeneous and homogeneous immunoassays, single molecule detection and microarray-based technologies.

Companies that develop their own automation solutions can also benefit from decades of expertise. We have an extensive, patent-protected technology pool of modules and components that is continuously expanding.

MosaiQ®  
Quotient Biodiagnostics

LIAISON® XS  
DiaSorin

Pictus 500  
Diatron

In addition to the software solutions integrated into STRATEC developed and manufactured instruments, we offer our partners flexible application options for deploying and controlling instruments, work processes and test volumes. Among other functionalities, these software solutions facilitate the interlinking of various systems, enable work volumes to be managed and provide access to the test results for evaluation by specialist staff.

Our Diatron brand offers instruments and associated reagents in the field of clinical chemistry, hematology for both human and veterinary use, immunoassay automation and molecular testing. Its portfolio includes ELISA, IFA and CLIA automated instrumentation platforms.
